

Be part of our global impact

A strong track record of success

Our collaborative conservation work delivers lasting change in key biodiversity areas around the world. Together with talented partners and passionate supporters like you, our impact to date includes:

98%

of hawksbill turtle nests protected with ProCosta

500+

water tanks built to benefit people and mountain gorillas

47,800

acres of coral, seagrass, and mangrove habitat conserved

1.7m

acres of key Asian elephant habitat protected

“

We cannot do this work without the communities that live here. They are the champions of conservation.

Ani Henríquez
President, ProCosta
El Salvador

Join us to accelerate conservation

Strengthen climate resilience

Healthy ecosystems are our greatest defense against the impacts of climate change. We are increasing community-led efforts to restore and preserve vital land and seascapes.

Protect at-risk wildlife

Endangered species face growing threats in our changing world. We are taking rapid action to reach more species in need, including Sunda pangolins and African forest elephants.

Activate the next generation

Engaged youth hold the key to a sustainable future. Our community of young, diverse talent is growing and thriving through fellowships, shared learning, and environmental education.

Amplify women's leadership

Our women-led initiatives improve human well-being and reduce environmental pressures. By increasing our investment in women, we are scaling our impact.

Protecting the future of our planet has never been more important.

With your support, we will expand our track record of success and the impact we deliver for wildlife, habitats, and people.

“

My goal is to inspire a young generation of Congolese to become conservation and research leaders in collaboration with local communities.

Dr. Augustin K. Basabose
Founder, Primate Expertise, DRC
National Geographic Explorer

We envision a world where wildlife flourishes in healthy ecosystems that sustain us all.

“
We hope through this collaboration, everyone will know that conservation is life.
